

# Infinity® Gas Furnaces

UP TO 98.5% EFFICIENT

SAVINGS WITHOUT SACRIFICING.

turn to the experts

Used to be if you wanted to save money on your heating bill you had to turn down the heat and throw on a sweater.

With our new line of Infinity® furnaces, you can save money on your heating bill without depriving yourself of the total comfort you desire.

# 3 WAYS INFINITY<sup>®</sup> GAS FURNACES PAY FOR THEMSELVES.

## 1) Highest efficiency heating that you can buy\*

The new line of Infinity furnaces offers up to 98.5% efficiencies, meaning up to 98.5¢ of every dollar spent on gas goes directly to heating the home. Standard furnaces can waste 20¢ or more per dollar.

But we didn't stop there. While gas is the direct fuel consumed to heat your home, electricity also plays an important role. And since we believe in saving you money wherever we can, Infinity furnaces have two high-efficiency motors built in — one for the blower and one for the inducer.

\*The 59MN7A060V21--20 is the most efficient furnace at 98.5 AFUE.

## 2) Precision heating

Instead of blasting your home with heat in a perpetual on/off cycle, Infinity® furnaces operate at a gentle, low capacity the majority of the time for quieter, more energy-efficient and more comfortable operation. It even adjusts the amount of heat created based on prior cycle run time, providing low heat during mildly chilly weather and more heat as temps drop. So you're only paying for the precise amount of heat you need.

## 3) Year-round humidity control

Your Infinity furnace isn't just a brilliant heating machine. When paired with a compatible air conditioner or heat pump, the furnace's high-efficiency variable-speed blower assists with Ideal Humidity System® technology in the summer months, helping to eliminate more moisture than a standard system. And in the winter, it smoothly and quietly circulates the air as the Infinity® control tells the humidifier\* how much moisture is necessary to keep the air from getting too dry in the home.

The right humidity levels can make you feel more comfortable at a higher temperature setting in the summer and a lower one in the winter. So you can save on energy without sacrificing comfort.

greenspeed™  
INTELLIGENCE

## Comfort, quiet and efficiency can all be yours.

When it comes to your home comfort, you should be greedy. Our new Infinity® 98 furnace provides up to 98.5% gas efficiency, tight temperature control and quiet operation.

The key is Greenspeed™ intelligence — our inter-system communication breakthrough that unites our adaptable-speed technology with Infinity intelligence.

Greenspeed intelligence gives homeowners precise comfort, constantly matching the system's output to the heating demands of the home at low capacity the majority of the time. This translates into reduced energy use and reduced temperature swings throughout a home. Integrating luxury-level comfort control into a home so smoothly and quietly, you'll forget it's there.

It's our new technology that takes into account your complete comfort. From degrees to dollars to decibels.
